INTRODUCTION

At Eva-Last we strive to set the standard for best practice when it comes to manufacturing as well as installation of our products and we are geared to offer lodge developers a turnkey solution from product supply through to design, consultation and on to final execution. Be it a new build or the renovation of an existing lodge Eva-Last is well equipped to assist.

When it comes to lodges, durable and low maintenance materials are key, making our range of long-lasting composite materials the perfect material for use in the bush. We offer a selection of unique composite technologies each with their own features and benefits.

Be it composite decking, balustrades, cladding or composite beams, any of these products are suitable for consideration when planning and building a potentially multi-faceted bush lodge we have the right mix to suit any aesthetic or budgetary consideration.

As leaders in composite building solutions, we are dedicated to delivering guaranteed, high-quality products, workmanship, and customer service to our local and cross border customers.

INSTALLATIONS

At Eva-Last our range of sustainable, cutting-edge composite technologies are highly engineered to suit almost any application, in any environment, making them an ideal choice for lodge applications. Thanks to our robust supply network, skilled sales consultants, and a dedicated team of installers, we have completed work throughout Africa in some of the toughest environments, in some of the most remote locations.

From intimate bush cabins to luxury safari resorts, Eva-Last bamboo composite has featured in them all, and our product range covers everything you need to create or upgrade your rustic or top-tier bush lodge.

BAMBOO COMPOSITE DECKING

Eva-Last has a range of bamboo composite technologies, differentiated through their brand features and benefits.

Apex[®]

Capping material:
Engineered acrylic polymer

Core material:
Bamboo foamed-PVC composite

Apex sets the standard for natural-looking eco-friendly composite. Its ultra-lightweight bamboo foamed-PVC core makes for easy installation and workability. Apex offers class-leading fire and slip resistance, and exceptional low maintenance, requiring only basic clearing for optimal longevity. Its protective cap is made from a resilient acrylic polymer coating offering long-term fade, scratch, and stain resistance.

TAKE HOME THE BENEFITS

Infinity[®] IS

Capping material:
Engineered acrylic polymer

Core material:
Bamboo PE composite

Infinity IS combines all the benefits of Infinity bamboo composite with the advantages of I-Series to give you a durable co-extruded composite. With Infinity IS specialised streaked colour variation technology, you can enjoy the look of timber and the environmental benefits of bamboo composite. The revolutionary I-beam design creates a cost-effective, lightweight board that uses less material, yet maintains span capabilities, strength, and stiffness for a more efficient installation.

Eva-tech[®] IS

Core & surface material:
Bamboo PE composite

Eva-tech IS combines all the benefits of Eva-tech bamboo composite with the advantages of I-Series to give you a cost-effective bamboo composite, offering slip resistance, low maintenance, reliable durability, and decay and weather resistance, as well as environmental benefits. The smart I-beam design creates a lightweight board that uses less material to save on transportation, substructure, and labour, yet maintains span capabilities and allows for more efficient installation.

CLADDING, BEAMS AND INDOOR FLOORING

Eva-Last has a range of sustainable building products for other areas of your lodge, from wall cladding to pergolas and features, and indoor flooring products.

VistaClad cladding boards in Infinity co-extruded capped bamboo composite offer exceptional durability. The hardy cellulose polymer core of Infinity is wrapped in a robust outer layer for a resilient composite. Infinity offers a low-maintenance, eco-friendly alternative to conventional cladding in a selection of natural finishes. Enjoy its resistance features, such as protection against scratches, fading, moisture, insects and weather, all backed by a 25 year warranty.

Lifespan architectural beams offer design versatility and increased span thanks to their specialised aluminium core that makes for easier installation at height. The outer coating of low-maintenance bamboo composite resists biodegradation, corrosion, insects, and harsh weather, and offers built-in UV protection for beautiful durability. Enjoy the look of timber beams without the upkeep.

CHOOSE SUSTAINABLE DECKING

RENEWABLE RESOURCES & RENEWABLE ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products use solar power as part of our manufacturing process. We are fully committed to bringing you a product that's holistically sustainable.

Every Eva-Last outdoor range pairs recycled raw ingredients with bamboo for a stronger, more sustainable composite. Bamboo rejuvenates over 30 times faster than traditional hardwoods and it releases 35% more oxygen into our air. Eva-Last is internationally recognised for our commitment to the environment. We're proud of the work we do to promote environmental sustainability, and invite you to choose timber alternatives that are gentle on the Earth.
